

TechHer for Government

Autumn 2024

Creating opportunities for women to learn and develop skills in technology

TechHer for Government is a free initiative designed to inspire curiosity and excitement about technologies such as Cloud, Artificial Intelligence, Data, Low Code/No Code App creation and Security. Sessions are aimed at women who work in the UK public sector, who do not necessarily have a technical background and are keen to gain confidence to learn more about technology.

Delivered 1 hour per week over 5 weeks via a Teams Webinar, these live and engaging sessions aspire to ignite your interest in technology and build your skills to a fundamental level. For those that are interested in going further, extra resources will be available to support additional learning to work towards a Microsoft Fundamentals certification.

Pre-registration is now open for an Autumn schedule. Pre-registration is important for us to gauge the level of interest and helps us plan and prepare the best possible learning experience for you. Pre-registration does not commit you to anything, it just lets us know that you are curious and eager to learn more and gives us permission to keep you informed.

Register Interest

This form will close on 31st August 2024 so please submit your response before then. This information will be used to contact you when TechHer for Government registration is open.

Week 1

Introduction to the program, types of learning resources available and subjects covered
